

SIANOL ZE

Cleaning concentrate

For the removal of cement residues etc.

Product description

SIANOL ZE is a highly concentrated cleaning agent based on an organic acid. It is completely volatile and leaves no harmful residues. Cement haze, lime deposits and efflorescence are dissolved.

Fields of application

SIANOL ZE is suitable for the removal of:

- Cement laitance or cement haze and efflorescence,
- mortar and concrete splashes,
- transport soiling, rust, etc.

Application on unplastered masonry and facing bricks as well as concrete paving stones, concrete goods and exposed aggregate concrete.

Application advantages

Significantly facilitates the cleaning of appropriately soiled substrates and shortens the cleaning time.

Processing instructions

Wear protective goggles and suitable gloves when processing SIANOL ZE.

SIANOL ZE should always be used **diluted**. The degree of dilution depends on the degree of soiling.

Dilution

SIANOL ZE : Water

Light soiling (facades)	1 : 5 (up to 1:15)
Heavy soiling	1 : 2 (maschinen, equipment, formwork)

Special instructions

- Pre-wet substrate slightly, avoid contact with metal.
- Not suitable for limestone, marble or rocks containing sodalite (Bahia Blue, Blue King, African Blue, ...).
- Test on an inconspicuous area.
- For enamel, a short-term application is recommended, then immediately and thoroughly wash off with water!

Technical properties

- clear liquid
- density: 1,1 g/cm³

Consumption

Depending on the desired application, approx. 100 - 250 g/m². Deviations are possible due to the type and thickness of contamination.

Packaging

- 10 kg container
- 25 kg container
- 1000 kg container

Storage

Store frost-free and protected from contamination.

Shelf life

In closed original packaging 12 months from date of manufacture.

Safety

See EC safety data sheet.

Environment

Container can be emptied of residues and recycled or disposed of according to type.
