

GraffiX Basic Remover

Graffiti removal in a system with GRAFFIX BASIC

Product description

For the removal of graffiti we recommend our special GRAFFIX BASIC REMOVER.

Due to the long open time, a better depth effect is made possible and graffiti can be removed from the pores. Overnight exposure times are also possible.

Our GRAFFIX BASIC REMOVER is environmentally friendly and has a mild odor.

Applications

Depending on the thickness of the graffiti and the degree of aging, we recommend to apply GRAFFIX BASIC REMOVER to the surface (e.g. with a brush) and let it react for at least 20 minutes. Then clean with a water jet. This dissolves the graffiti coating and it runs off. The work should be carried out from top to bottom.

The resulting sludge and production residues must be disposed of as special waste; any waste steam must be collected and treated in accordance with local regulations.

After cleaning, it is advisable to refresh the protection with our GRAFFIX BASIC impregnation.

Packaging

1 KG bucket

Special quantities can be filled upon request.

Storage

Store in a cool, well-ventilated place.

Shelf life

Shelf life 1 year in closed original packaging.

Safety

See EC safety data sheet.

Environment

Container can be emptied of residues and recycled or disposed of according to type.
